

Sinopharm Chemical Reagent Co., Ltd.

Notice

About occurrence of fake and imitation of the sinopharm products in the overseas market.

Recently, our company has found that some companies and individuals are suspected of using the name of sinopharm, copying and imitating the company's product models and information, and selling their fake to consumers. Counterfeit products mainly involve Tween 20, Tween 80, copper wire and other chemical reagents. The main circulation areas are the Republic of Singapore and the Republic of Indonesia. Such counterfeit products are not only illegal products that infringe on the intellectual property and commercial profit of the company, but their packaging and ingredients are not the same as the our company's regular products, and the use of counterfeit products may cause serious quality problems.

Therefore we remind consumers beware of the above-mentioned counterfeit products circulating in the Republic of Singapore and the Republic of Indonesia, and advise the consumers to purchase the company's products from the company and the company's regular agents in the region.

In addition, our company is not responsible for any problems or malfunctions caused by the use of counterfeit products.

Thank you for your kindness and support for our products. If you have any questions or needs, please contact us in time, thank you!
